

AFFILIATE MARKETING SOLUTIONS DESIGNED for advertisers WHO DEMAND services that deliver results.

At LinkShare, we're results driven – we won't be satisfied until you reach your goals. LinkShare provides you with the superior network, the best technologies and expert account management to develop and manage scalable campaigns that achieve the results you desire.

FEATURED CLIENTS

Established UK Brands Join the LinkShare Affiliate Network

Launched in August 2006, the LinkShare UK Network has already developed over 40 new customer partnerships. These new customers include brands such as luxury online fashion retailer Net-A-Porter, global fashion and home furnishing brand Laura Ashley, leading UK Department Store House of Fraser as well as Goldsmiths— one of the world's largest quality jewellers and popular fashion retailers Boden and Kew. Outside of Retail, leading travel sites such as Kayak, Radisson Edwardian, and Mr. and Mrs. Smith have completed partnerships with LinkShare in 2007. Our client service is unique to the UK market and includes offering customers both strategic and tactical insight into using data to improve brand promotion, leverage emerging media like social networking and increase traffic and sales throughout the life of their program.

Leverage LinkShare's Superior Network

At LinkShare you'll find a volume and quality of affiliates not available through non-exclusive providers. LinkShare's unique Find New Affiliates feature helps you expand your affiliate program by mining the LinkShare Network for affiliate partners that meet your criteria. No other service provider offers this powerful recruitment tool. LinkShare is proud of our Distribution Services department, which works around the clock to add and manage new affiliates. Distribution Services manages relationships with high producing and high potential affiliates within the LinkShare Network with the goal of creating and enhancing as many productive links as possible between affiliates and merchants like you.

LinkShare's Patented, Accurate Tracking Technology

LinkShare is proud to use our very own, patented technology to deliver unparalleled accuracy and reliability in reporting for you. Unlike pixel technology used in other networks, LinkShare uses a core tracking technology that is not cookie based, which prevents transaction loss from blocked cookies or other pixel errors. This technology can help you rest easy knowing that transactions between the Publisher sites and your own site are being accurately reflected.

Robust Risk Management Tools that Protect Your Company

LinkShare provides you with the most robust and reliable risk management and brand control tools in the industry – tools we view not as optional, but as essential for stewarding your brand. With unique tools like the Affiliate Application Filter, Affiliate Content Spider and the ability to dynamically change creative, you can scale your program to ensure maximum return. With LinkShare's channel management tools, you have complete control over your affiliate channel and the relationship your customers have with your brand.
